

## ONE SIZE REALLY DOES NOT FIT ALL!

### **Personalised cosmetic face and body surgery to create a better version of you at the hands of esteemed BAAPS-accredited plastic surgeon, Mr Joseph Walls**

With over a decade of consultant experience, board certified plastic surgeon Mr Joseph Walls is an expert in deep plane facelifts following years of facial reconstruction. Coming first in the national selection process, he has undertaken prestigious and sought-after cosmetic surgery fellowships during his training. “The key with facelifting is not to make it insanely tight, like the wind-swept and trout-mouth look. It’s all in making it natural-looking so it gives you a more rejuvenated and refreshed appearance.” Each facelift Mr. Walls performs is completely bespoke, and where necessary, adjunctive procedures are offered. These can include a neck lift, with or without liposuction to sculpt and contour the junction between the face and the neck; a gliding brow lift and upper or lower blepharoplasty can address the upper third of the face, where facelifts do not. Patients of Mr Walls are consistently ecstatic with their results, and it helps that he’s approachable and always sincere. “I always tell my patients that they only have one chance to heal well, and it’s so important that they’re completely on board from the start of their aesthetic journey — that’s why I’m always so candid.”

Besides tailored facelifts, Mr Walls also performs cosmetic breast and body contouring surgery. Again, these are personalised so that if you’re an extensive weight-loss patient, a lower body lift combined with power-assisted liposuction may be the better option than just a standard tummy-tuck. Arm and thigh lifts are often in demand as finishing touches after a monumental body transformation. Breast reduction and augmentation are popular requests. “Often, patients come in because they want a more restored appearance of their breasts after childbirth and breast-feeding, and a straightforward augmentation will just not achieve this; so an augmentation by implant or fat grafting plus mastopexy (uplift) is required.” Male chest surgery and aesthetic genital surgery are also in demand.

● **Consultation: £200. Facelifts from £8,500. Based at: Fitzwilliam Hospital, PE3 9AQ and The Hamptons Hospital, PE7 8FD (45mins from London, 100mins from Leeds). Secretary — Emma Thurston T: 07504 233601 E: [emma.thurston@nhs.net](mailto:emma.thurston@nhs.net)**
